Prof. Dr. Frank Andreas Schittenhelm

Introduction to Financial Accounting

---

## Basic Literature

- **Anthony/Hawkins/Merchant:** *Accounting*, 11<sup>th</sup>ed., McGraw-Hill

## Additional Literature

- **Dyckman/Dukes/Davis:** *Intermediate Accounting*, 4<sup>th</sup>ed., McGraw-Hill
- **Horngren/Harrison/Bamber:** *Accounting*, 5<sup>th</sup>ed., Prentice Hall
- **Hoyle/Schaefer/Doupnik:** *Advanced Accounting*, 5<sup>th</sup>ed., McGraw-Hill
- **Perks:** *Financial Accounting for Non-Specialists*, McGraw-Hill

# Table of Contents

---

## Introduction to Financial Accounting

- 1. Introduction**
- 2. Balance Sheet**
- 3. Income Statement**
- 4. Double Entry System**
- 5. Cash Flow Statement**
- 6. Inventory**
- 7. Fixed Assets**
- 8. Financial Analysis**

# 1. Introduction to Financial Accounting

## Learning Target Financial Accounting

---

**The learning target of this chapter is to understand**

- ✓ **the content of financial statements,**
- ✓ **the concept of the „double entry system“,**
- ✓ **the impact of different costing methods,**
- ✓ **the concept of depreciation,**
- ✓ **measures used in financial analysis.**

# 1. Introduction to Financial Accounting

## 1.1. Introduction (2)

---

### Goal:

- Corporations need to communicate their results.
- Business activity is recorded, summarized and analysed
- Within the company: accounting information provides means to control, evaluate and plan operations

### Target groups:

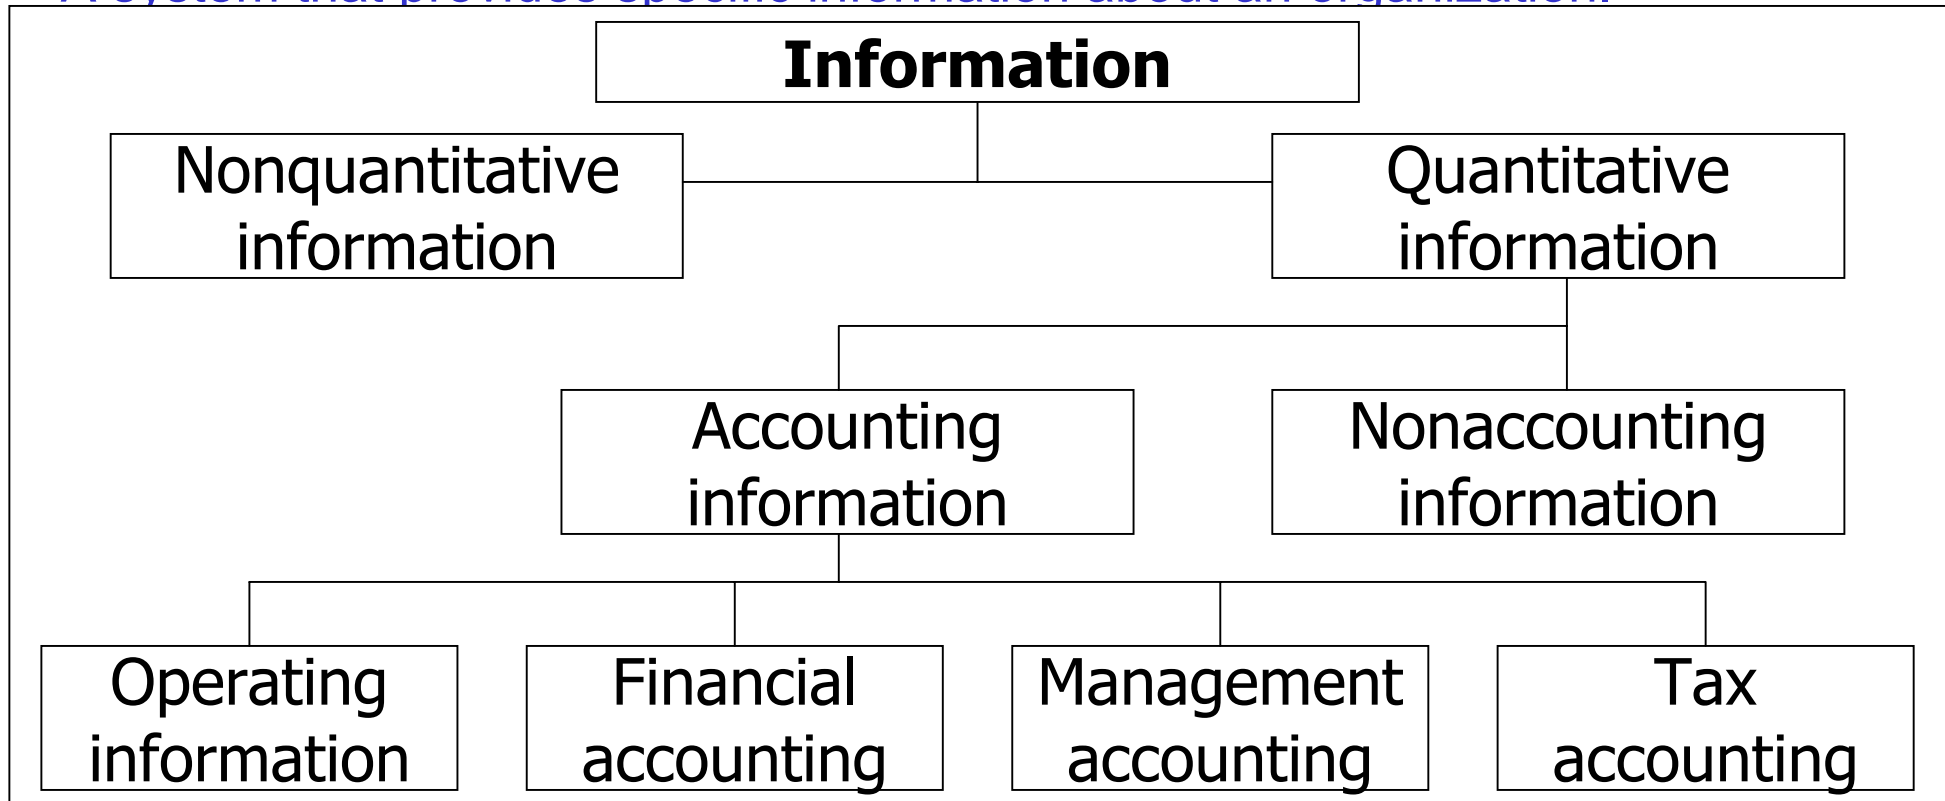

- Employees
- Investors
- Creditors
- Customers
- Suppliers
- Communities

# 1. Introduction to Financial Accounting

## 1.1. Introduction (3)

### Accounting:

A system that provides specific information about an organization.

Source: Anthony et.al., „Accounting“, McGraw-Hill, 2003, p.3

# 1. Introduction to Financial Accounting

## 1.1. Introduction (4)

---

### Definition (from the American Accounting Association Committee):

Accounting is the process of identifying, measuring, and communicating economic information to permit informed judgements and decisions by users of the information.

Financial statements are the final product of the accounting process, they typically consist of

**Balance Sheet, Income Statement, Cash Flow Statement**

### Profession of Accountants:

- Bookkeepers and other data-entry employees
- Staff accountants who decide how items should be reported, prepare the reports, interpret these reports, etc.
- Independent public accountants: Certified Public Accountants (CPAs), American Institute of Certified Public Accountants (AICPA)

# 1. Introduction to Financial Accounting

## 1.1. Introduction (5)

---

### History:

Accounting has been around from the beginning of time:

- **In biblical times to keep track of how much grain was stored in the community's silos**
- **Luca Pacioli: Summa – Codification of the double entry bookkeeping 1494**
- **In modern times accounting answers basic questions about a business as:**
  - What does a company own?
  - How much does a company owe others?
  - How well did a company's operations perform?
  - How does the company get the cash to fund itself?

# 1. Introduction to Financial Accounting

## 1.1. Introduction (6)

---

### Study Goals:

- Ability to ask for relevant accounting information
- Ability to use relevant accounting information
- **Not** to acquire expert knowledge of complex accounting rules

### It is relevant

- for decision making
- in settlement negotiations
- if personal performance is evaluated with accounting data

# 1. Introduction to Financial Accounting

## 1.2. Balance Sheet

### Definition:

A Balance Sheet (formal: statement of financial position) reports the assets and equities (liabilities and owners' equity) of the entity (company) at a specific moment in time → status report

### Fundamental Accounting Equation

Assets = Liabilities + Owner's Equity

# 1. Introduction to Financial Accounting

## 1.2. Balance Sheet (2)

---

### **Assets:**

Assets are the resources that the company possess for the future benefit of the business

- Cash
- Marketable Securities
- Accounts Receivables
- Inventory
- Prepaid Expenses
- Land
- Equipment
- Buildings
- Investments
- Intangible Assets

# 1. Introduction to Financial Accounting

## 1.2. Balance Sheet (3)

---

### **Liabilities:**

Liabilities are obligations to repay borrowing, debts, and other obligations to provide goods or services to others.

- Bank debt
- Amounts owed to suppliers: accounts payable
- Prepaid accounts or advances from customers to deliver goods and services
- Taxes owed
- Wages owed to employees

### **Owner's equity:**

Owner's equity is the accumulated measure of the owners' investment in the company.

- Common stock
- Additional paid-in capital
- Retained earnings

# 1. Introduction to Financial Accounting

## 1.2.1. Accounting Transaction

---

**The Balance Sheet is always in *balance*.**

Four categories of accounting transactions affect the balance sheet

- Assets Exchange  
Example: Company buys a machine and pays in cash (price 1.000 €)
- Liabilities/Equity Exchange  
Example: Company takes loan to pay accounts payable
- Assets and Liabilities/Equity increase  
Example: Company buys a machine on credit (price 1.000 €)
- Assets and Liabilities/Equity decrease  
Example: Company pays back credit with cash (10.000 €)

# 1. Introduction to Financial Accounting

## 1.2.1. Accounting Transaction (2)

**Example:** You decide to start your own business.

Starting Balance Sheet:

<b>Assets</b>	<b>01</b>	<b>02</b>
Cash	0	
Accounts receivable	0	
Inventory	0	
Net fixed assets	0	
<b>Total assets</b>	<b>0</b>	

<b>Liabilities and Equity</b>	<b>01</b>	<b>02</b>
Current liabilities	0	
Long-term debt	0	
Paid-in capital	0	
Retained earnings	0	
<b>Total liabilities and equity</b>	<b>0</b>	

Transactions:

- You start your own business by depositing 10.000 € in a bank account.
- You buy inventory for 2.000 € (term of credit: 3 month).
- You buy furniture for your office for 1.000 €.
- After 3 month: you pay for your inventory.

# 1. Introduction to Financial Accounting

## 1.2.1. Accounting Transaction (3)

### Example: Balance Sheet Changes:

You start your own business by depositing 10.000 € in a bank account.

<b>Assets</b>	<b>01</b>	<b>02</b>
Cash	0	10.000
Accounts receivable	0	0
Inventory	0	0
Net fixed assets	0	0
<b>Total assets</b>	<b>0</b>	<b>10.000</b>

<b>Liabilities and Equity</b>	<b>01</b>	<b>02</b>
Current liabilities	0	0
Long-term debt	0	0
Paid-in capital	0	10.000
Retained earnings	0	0
<b>Total liabilities and equity</b>	<b>0</b>	<b>10.000</b>

You buy inventory for 2.000 € (term of credit: 3 month).

<b>Assets</b>	<b>01</b>	<b>02</b>
Cash	0	10.000
Accounts receivable	0	0
Inventory	0	2.000
Net fixed assets	0	0
<b>Total assets</b>	<b>0</b>	<b>12.000</b>

<b>Liabilities and Equity</b>	<b>01</b>	<b>02</b>
Current liabilities	0	2.000
Long-term debt	0	0
Paid-in capital	0	10.000
Retained earnings	0	0
<b>Total liabilities and equity</b>	<b>0</b>	<b>12.000</b>

# 1. Introduction to Financial Accounting

## 1.2.1. Accounting Transaction (4)

### Example: Balance Sheet Changes:

You buy furniture for your office for 1.000 €.

<b>Assets</b>	<b>01</b>	<b>02</b>
Cash	0	9.000
Accounts receivable	0	0
Inventory	0	2.000
Net fixed assets	0	1.000
<b>Total assets</b>	<b>0</b>	<b>12.000</b>

<b>Liabilities and Equity</b>	<b>01</b>	<b>02</b>
Current liabilities	0	2.000
Long-term debt	0	0
Paid-in capital	0	10.000
Retained earnings	0	0
<b>Total liabilities and equity</b>	<b>0</b>	<b>12.000</b>

After 3 month: you pay for your inventory

<b>Assets</b>	<b>01</b>	<b>02</b>
Cash	0	7.000
Accounts receivable	0	0
Inventory	0	2.000
Net fixed assets	0	1.000
<b>Total assets</b>	<b>0</b>	<b>10.000</b>

<b>Liabilities and Equity</b>	<b>01</b>	<b>02</b>
Current liabilities	0	0
Long-term debt	0	0
Paid-in capital	0	10.000
Retained earnings	0	0
<b>Total liabilities and equity</b>	<b>0</b>	<b>10.000</b>

# 1. Introduction to Financial Accounting

## 1.2.2. Exercise

---

### Nonprofit Inc.:

You intend to open a bookstore.

Consider the following transactions one by one and show the respective effects of these transactions on the balance sheet.

- You start your own business by depositing 20.000 € in a bank account.
- In addition, you take out a loan from the bank (amount 14.000 €)
- You purchase a computer for 2.000 € on credit.
- You purchase merchandise (books) for 20.000 €.
- You pay back part of the loan (4.000 €).
- You sell books for 10.000 €.
- You purchase books for 6.000 € on credit.
- You pay back the credit for your computer.
- Has your business been successful?

# 1. Introduction to Financial Accounting

## 1.2.2. Exercise (2)

### Nonprofit Inc.:

You start your own business by depositing 20.000 € in a bank account.

<b>Assets</b>		<b>1.</b>	<b>2.</b>	<b>3.</b>	<b>4.</b>	<b>5.</b>	<b>6.</b>	<b>7.</b>	<b>8.</b>
Cash	0	20.000							
Accounts Rec.	0	0							
Inventory	0	0							
Fixed Assets	0	0							
<b>Total Assets</b>	<b>0</b>	<b>20.000</b>							
<b>Liabilities and Equity</b>									
C/Liabilities	0	0							
Long-term debt	0	0							
Owners' equity	0	20.000							
Ret. Earnings									
<b>Total Liabilities and Equity</b>	<b>0</b>	<b>20.000</b>							

# 1. Introduction to Financial Accounting

## 1.3. Income Statement

### Definition:

An **Income Statement** (or: profit and loss statement) reports how profitable a company has been during a period. The income statement explains how this income was earned. It summarizes the revenues and the expenses.

The basic income statement equation is:

$$\text{Revenues} - \text{Expenses} = \text{Net income}$$

The Income Statement is a flow report

Source: Anthony et.al., „Accounting“, McGraw-Hill, 2003, p.54

# 1. Introduction to Financial Accounting

## 1.3. Income Statement (2)

### Typical Income Statement:

Net Sales
- Cost of Sales (Goods Sold)
<b>= Gross Margin</b>
- Research and Development Expense
- Selling, General, and Administrative Expenses
<b>= Operating Income</b>
- Other Revenues (Expenses)
<b>= Income (Profit) before Income Taxes</b>
- Provision for Income Tax (Tax Expenses)
<b>= Net income</b>
- Dividends
<b>= Retained Earnings</b>

# 1. Introduction to Financial Accounting

## 1.3. Income Statement (3)

---

### Items of the Income Statement:

- Net Sales = Gross Sales – Returns and Allowances – Sales Discounts:  
Usually sales tax is not included
- Cost of Sales
- Gross Margin (or Gross Profit)
- Research and Development Expense, Selling, General, and Administrative Expenses: mainly fixed costs
- Other Revenues: Interest and dividends earned on marketable securities, royalties etc.
- Other Expenses: Interest
- Tax Expenses
- Net Income or Net Loss
- Earnings per Share of Common Stock (common in USA)
- Statement of Retained Earnings:  
Add: Net Income      Deduct: Dividends

# 1. Introduction to Financial Accounting

## 1.3. Income Statement (4)

---

### Accrual Accounting:

Accrual Accounting measures income for a period as the difference between the revenues recognized in that period and the expenses that are matched with those revenues.

### Other Concepts of Income:

- **Cash-basis Accounting:** Sales and costs are not recorded until the period in which they received cash.
- **Modified Cash-basis Accounting:** Depreciation for long-lived assets
  - ➔ For smaller companies with rather no fixed assets
- **Income Tax Accounting:** general goal: reduce taxable income and/or postpone
  - ➔ tax payments

# 1. Introduction to Financial Accounting

## 1.3.1. Accounting Transaction

**Example** Company ABC Inc. made the following financial statements in 2001.

<b>Assets</b>	<b>2001</b>	<b>Liabilities and Equity</b>	<b>2001</b>
Cash	1000	Current liabilities	4000
Accounts receivable	1000	Long-term debt	4000
Inventory	1000	Common stock	4000
Net fixed assets	9000	Retained earnings	0
<b>Total assets</b>	<b>12000</b>	<b>Total liabilities and equity</b>	<b>12000</b>

<b>Income statement</b>	<b>2001</b>
Sales	8000
- Costs	- 7200
- Depreciation	- 0
= EBIT	800
- Interest paid	- 800
- Taxes	- 0
= Net income	0

**What are the impacts of the following accounting transactions?**

# 1. Introduction to Financial Accounting

## 1.3.1. Accounting Transaction (2)

**Example:** 1. Reimbursement of long-term debt (amount 500 €) with cash

Assets	2001	2002/1.
Cash	1000	500
Accounts receivable	1000	1000
Inventory	1000	1000
Net fixed assets	9000	9000
<b>Total assets</b>	<b>12000</b>	<b>11500</b>

Liabilities and Equity	2001	2002/1.
Current liabilities	4000	4000
Long-term debt	4000	3500
Common stock	4000	4000
Retained earnings	0	0
<b>Total liabilities and equity</b>	<b>12000</b>	<b>11500</b>

Income statement	2001	2002/1.						
Sales	8000	8000						
- Costs	- 7200	- 7200						
- Depreciation	- 0	- 0						
- Accruals	- 0	- 0						
= EBIT	800	800						
- Interest paid	- 800	- 800						
- Taxes	- 0	- 0						
<b>= Net income</b>	<b>0</b>	<b>0</b>						

# 1. Introduction to Financial Accounting

## 1.3.1. Accounting Transaction (3)

**Example:** 2. Additionally, buying inventory for 500 € (cash) selling it for 800 € (cash)

Assets	2002/1.	2002/2.
Cash	500	800
Accounts receivable	1000	1000
Inventory	1000	1000
Net fixed assets	9000	9000
<b>Total assets</b>	<b>11500</b>	<b>11800</b>

Liabilities and Equity	2002/1.	2002/2.
Current liabilities	4000	4000
Long-term debt	3500	3500
Common stock	4000	4000
Retained earnings	0	300
<b>Total liabilities and equity</b>	<b>11500</b>	<b>11800</b>

Income statement	2001	2002/1.	2002/2.					
Sales	8000	8000	8800					
- Costs	- 7200	- 7200	- 7700					
- Depreciation	- 0	- 0	- 0					
- Accruals	- 0	- 0	- 0					
= EBIT	800	800	1100					
- Interest paid	- 800	- 800	- 800					
- Taxes	- 0	- 0	- 0					
= Net income	0	0	300					

# 1. Introduction to Financial Accounting

## 1.3.1. Accounting Transaction (4)

**Example:** 3. Additionally, depreciate net fixed assets by 200 €

Assets	2002/2.	2002/3.
Cash	800	800
Accounts receivable	1000	1000
Inventory	1000	1000
Net fixed assets	9000	8800
<b>Total assets</b>	<b>11800</b>	<b>11600</b>

Liabilities and Equity	2002/2.	2002/3.
Current liabilities	4000	4000
Long-term debt	3500	3500
Common stock	4000	4000
Retained earnings	300	100
<b>Total liabilities and equity</b>	<b>11800</b>	<b>11600</b>

Income statement	2001	2002/1.	2002/2.	2002/3.				
Sales	8000	8000	8800	8800				
- Costs	- 7200	- 7200	- 7700	- 7700				
- Depreciation	- 0	- 0	- 0	- 200				
- Accruals	- 0	- 0	- 0	- 0				
= EBIT	800	800	1100	900				
- Interest paid	- 800	- 800	- 800	- 800				
- Taxes	- 0	- 0	- 0	- 0				
<b>= Net income</b>	<b>0</b>	<b>0</b>	<b>300</b>	<b>100</b>				

# 1. Introduction to Financial Accounting

## 1.3.1. Accounting Transaction (5)

**Example:** 4. Additionally, suppose 800 € of the sales are on credit

Assets	2002/3.	2002/4.
Cash	800	0
Accounts receivable	1000	1800
Inventory	1000	1000
Net fixed assets	8800	8800
<b>Total assets</b>	<b>11600</b>	<b>11600</b>

Liabilities and Equity	2002/3.	2002/4.
Current liabilities	4000	4000
Long-term debt	3500	3500
Common stock	4000	4000
Retained earnings	100	100
<b>Total liabilities and equity</b>	<b>11600</b>	<b>11600</b>

Income statement	2001	2002/1.	2002/2.	2002/3.	2002/4.			
Sales	8000	8000	8800	8800	8800			
- Costs	- 7200	- 7200	- 7700	- 7700	- 7700			
- Depreciation	- 0	- 0	- 0	- 200	- 200			
- Accruals	- 0	- 0	- 0	- 0	- 0			
= EBIT	800	800	1100	900	900			
- Interest paid	- 800	- 800	- 800	- 800	- 800			
- Taxes	- 0	- 0	- 0	- 0	- 0			
= Net income	0	0	300	100	100			

# 1. Introduction to Financial Accounting

## 1.3.1. Accounting Transaction (6)

**Example:** 5. Additionally, suppose 200 € of the inventory is on credit (by suppliers)

Assets	2002/4.	2002/5.
Cash	0	200
Accounts receivable	1800	1800
Inventory	1000	1000
Net fixed assets	8800	8800
<b>Total assets</b>	<b>11600</b>	<b>11800</b>

Liabilities and Equity	2002/4.	2002/5.
Current liabilities	4000	4200
Long-term debt	3500	3500
Common stock	4000	4000
Retained earnings	100	100
<b>Total liabilities and equity</b>	<b>11600</b>	<b>11800</b>

Income statement	2001	2002/1.	2002/2.	2002/3.	2002/4.	2002/5.		
Sales	8000	8000	8800	8800	8800	8800		
- Costs	- 7200	- 7200	- 7700	- 7700	- 7700	- 7700		
- Depreciation	- 0	- 0	- 0	- 200	- 200	- 200		
- Accruals	- 0	- 0	- 0	- 0	- 0	- 0		
= EBIT	800	800	1100	900	900	900		
- Interest paid	- 800	- 800	- 800	- 800	- 800	- 800		
- Taxes	- 0	- 0	- 0	- 0	- 0	- 0		
= Net income	0	0	300	100	100	100		

# 1. Introduction to Financial Accounting

## 1.3.1. Accounting Transaction (7)

**Example:** 6. Additionally, suppose you must pay 50% taxes

Assets	2002/5.	2002/6.
Cash	200	150
Accounts receivable	1800	1800
Inventory	1000	1000
Net fixed assets	8800	8800
<b>Total assets</b>	<b>11800</b>	<b>11750</b>

Liabilities and Equity	2002/5.	2002/6.
Current liabilities	4200	4200
Long-term debt	3500	3500
Common stock	4000	4000
Retained earnings	100	50
<b>Total liabilities and equity</b>	<b>11800</b>	<b>11750</b>

Income statement	2001	2002/1.	2002/2.	2002/3.	2002/4.	2002/5.	2002/6.	
Sales	8000	8000	8800	8800	8800	8800	8800	
- Costs	- 7200	- 7200	- 7700	- 7700	- 7700	- 7700	- 7700	
- Depreciation	- 0	- 0	- 0	- 200	- 200	- 200	- 200	
- Accruals	- 0	- 0	- 0	- 0	- 0	- 0	- 0	
= EBIT	800	800	1100	900	900	900	900	
- Interest paid	- 800	- 800	- 800	- 800	- 800	- 800	- 800	
- Taxes	- 0	- 0	- 0	- 0	- 0	- 0	- 50	
= Net income	0	0	300	100	100	100	50	

# 1. Introduction to Financial Accounting

## 1.3.1. Accounting Transaction (8)

**Example:** 7. Additionally, suppose you set up accruals for 100 €

Assets	2002/6.	2002/7.
Cash	150	200
Accounts receivable	1800	1800
Inventory	1000	1000
Net fixed assets	8800	8800
<b>Total assets</b>	<b>11750</b>	<b>11800</b>

Liabilities and Equity	2002/6.	2002/7.
Current liabilities	4200	4200
Accruals		100
Long-term debt	3500	3500
Common stock	4000	4000
Retained earnings	50	0
<b>Total liabilities and equity</b>	<b>11750</b>	<b>11800</b>

Income statement	2001	2002/1.	2002/2.	2002/3.	2002/4.	2002/5.	2002/6.	2002/7.
Sales	8000	8000	8800	8800	8800	8800	8800	8800
- Costs	- 7200	- 7200	- 7700	- 7700	- 7700	- 7700	- 7700	- 7700
- Depreciation	- 0	- 0	- 0	- 200	- 200	- 200	- 200	- 200
- Accruals	- 0	- 0	- 0	- 0	- 0	- 0	- 0	- 100
= EBIT	800	800	1100	900	900	900	900	800
- Interest paid	- 800	- 800	- 800	- 800	- 800	- 800	- 800	- 800
- Taxes	- 0	- 0	- 0	- 0	- 0	- 0	- 50	0
<b>= Net income</b>	<b>0</b>	<b>0</b>	<b>300</b>	<b>100</b>	<b>100</b>	<b>100</b>	<b>50</b>	<b>0</b>

# 1. Introduction to Financial Accounting

## 1.3.1. Accounting Transaction (9)

### What's really going on? Cash flows from operating activities!

Cash flows	CASH 2002	Income statement 2002
Sales	8000	8800
- Costs	- 7500	- 7700
- Depreciation		- 200
-/+ Accruals		- 100
= EBIT		800
- Interest paid	- 800	- 800
- Taxes		0
		net income 0
Cash flow	- 300	

Where are the missing 500 €?

# 1. Introduction to Financial Accounting

## 1.3.2. Exercise

### Exercise

You own a small restaurant that made the following financial statement in year 01

### The Balance Sheet for year 01 is:

<b>Assets</b>	<b>01</b>	<b>Liabilities and Equity</b>	<b>01</b>
Cash	10	Current liabilities	200
Marketable Securities	330	Long-term debt	400
Inventory	10	Paid-in Capital	100
Net fixed assets	470	Retained earnings	120
<b>Total assets</b>	<b>820</b>	<b>Total liabilities and equity</b>	<b>820</b>

# 1. Introduction to Financial Accounting

## 1.3.2. Exercise (2)

The Income Statement for year 01 is:

Income statement	01
Sales	+ 22.320
- Costs	- 4.800
- Wages	- 11.640
- Rent	- 5.240
- Advertising	- 60
- Depreciation Expenses	- 30
= EBIT	+ 550
+ Other Revenues	+ 20
- Interest paid	- 40
- Taxes (30%)	- 159
= Net income	+ 371
- Dividends	- 251
= Retained Earnings	+ 120

# 1. Introduction to Financial Accounting

## 1.3.2. Exercise (3)

Assume the following transactions during the next period:

■ Current liabilities (accounts payable) are paid	200
■ You pay wages	12.170
■ You buy food, drinks for your restaurant	4.700
■ Part of the food is on credit	400
■ You buy new furniture for your restaurant	100
■ You give some old furniture away (book value 20)	0
■ You depreciate your fixed assets	40
■ You sell part of your market securities (shares: book value 200)	400
■ Revenues from your market securities	10
■ Your inventory remains unchanged	10
■ You pay for rent	5.240
■ For a new marketing strategy you pay	100
■ You sell food for	23.040
■ You decide to pay back long-term debt	100
■ Therefore, your interest payments are	30
■ You decide to add 40% of your net income to your retained earnings	

# 1. Introduction to Financial Accounting

## 1.3.2. Exercise (4)

The Income Statement for year 02 is:

Income statement	02
Sales	
- Costs	
- Wages	
- Rent	
- Advertising	
- Depreciation Expenses	
= EBIT	
+ Other Revenues	
- Other Expenses (furniture)	
- Interest paid	
- Taxes (30%)	
= Net income	
- Dividends	
= Retained Earnings	

# 1. Introduction to Financial Accounting

## 1.3.2. Exercise (5)

The Balance Sheet for year 02 is:

<b>Assets</b>	<b>02</b>	<b>Liabilities and Equity</b>	<b>02</b>
Cash		Current liabilities	
Marketable Securities		Long-term debt	
Inventory		Paid-in Capital	
Net fixed assets		Retained earnings	
Total assets		Total liabilities and equity	

# 1. Introduction to Financial Accounting

## 1.4. Double Entry System

- Accountants make journal entries to record each individual transaction.
- The accountants' books are called general ledger.

### Rules for Entries into Accounts:

<p><b>Asset Accounts</b></p> <hr/> <table border="1"> <tbody> <tr> <td>Debit Increase</td> <td>Credit Decrease</td> </tr> </tbody> </table>	Debit Increase	Credit Decrease	<p><b>Liability Accounts</b></p> <hr/> <table border="1"> <tbody> <tr> <td>Debit Decrease</td> <td>Credit Increase</td> </tr> </tbody> </table> <p><b>Equity Accounts</b></p> <hr/> <table border="1"> <tbody> <tr> <td>Debit Decrease</td> <td>Credit Increase</td> </tr> </tbody> </table>	Debit Decrease	Credit Increase	Debit Decrease	Credit Increase
Debit Increase	Credit Decrease						
Debit Decrease	Credit Increase						
Debit Decrease	Credit Increase						

# 1. Introduction to Financial Accounting

## 1.4. Double Entry System (2)

### Example:

A company issues own shares for 1.000.000 € in cash

Balance Sheet Journal Entry:

Account Title	Debit	Credit	Effect
Cash	1.000.000		Increase
Common Stock		1.000.000	Increase

A bank debt is repaid with cash 20.000 €

Account Title	Debit	Credit	Effect
Bank Debt	20.000		Decrease
Cash		20.000	Decrease

# 1. Introduction to Financial Accounting

## 1.4. Double Entry System (3)

### Example:

A company sells goods for 200.000 € in cash

Income Statement Journal Entry:

Account Title	Debit	Credit	Effect
Cash	200.000		Increase
Sales Revenue		200.000	Increase

The costs are recorded:

Account Title	Debit	Credit	Effect
Cost of Goods Sold	180.000		Decrease
Inventory		180.000	Decrease

# 1. Introduction to Financial Accounting

## 1.4. Double Entry System (4)

### Example:

Assume the two entries are the only income statement entries for the whole year.

Income Statement Year End Close Out Entry:

Account Title	Debit	Credit	Effect
Sales Revenue	200.000		Reversal
Income		200.000	Increase
Income	180.000		Decrease
Cost of Goods Sold		180.000	Reversal
Income	20.000		Reversal
Retained Earnings		20.000	Increase

Account Title	Debit	Credit	Effect
Retained Earnings	20.000		Reversal
Close Out Balance Sheet		20.000	Increase

# 1. Introduction to Financial Accounting

## 1.4. Double Entry System (5)

Put it all together:

# 1. Introduction to Financial Accounting

## 1.5. Cash Flow Statement

---

### Definition:

A **Cash Flow Statement** shows the net change in cash for the year.

- Was the company a seemingly profitable company, but must borrow heavily just to stay alive?
- Did the company's operations throw off cash, even though it may be just marginally profitable according to the income statement?
- What is relationship between cash flow and earnings?
- How are dividends financed?
- How are debts paid off?
- How is the cash generated by operations used
- Are management's stated financial policies reflected in the cash flow?

# 1. Introduction to Financial Accounting

## 1.5. Cash Flow Statement (2)

---

### Types of business activities:

#### Operations Activities

- When the company is healthy, operating activities will generate cash

#### Investing Activities

- Does the company require a great investment in fixed assets?
- Is the company selling off its assets to fill an insatiable cash drain from operations?

#### Financing Activities

- Did the company borrow heavily?
- Has the company gone to investors to fund its operational or investing activities?

Rearranging the fundamental accounting equation one gets:

**Cash+Other Current Assets+Fixed Assets = Current Liabilities + LT Debt + Equity**

**Cash = Current Liabilities – Current Assets – Fixed Assets + LT Debt + Equity**

# 1. Introduction to Financial Accounting

## 1.5.1. Accounting Transaction

---

### Operating activities

- + Net income
- +/- Increase/decrease in accruals, provisions
- + Depreciation
- +/- Any decrease/increase in current assets (except cash)
- +/- Increase/decrease in accounts payable

### Investment activities

- + Ending fixed assets
- – Beginning fixed assets
- + Depreciation

### Financing activities

- +/- Increase/decrease in notes payable
  - +/- Increase/decrease in long-term debt
  - + Increase in common stock
  - – Dividends paid
-

# 1. Introduction to Financial Accounting

## 1.5.1. Accounting Transaction (2)

### Alternative ways to calculate cash flows from operating activities!

Cash flows	2002	2002
Sales	8000	8800
- Costs	- 7500	- 7700
- Depreciation		- 200
-/+ Accruals		- 100
= EBIT		800
- Interest paid	- 800	- 800
- Taxes		0
Net income		0
+/- Accruals		+ 100
+ Depreciation		+ 200
- increase current assets (except cash)		- 800
+ increase current liabilities		+ 200
Cash flow	- 300	- 300

# 1. Introduction to Financial Accounting

## 1.5.1. Accounting Transaction (3)

### Example what is the cash flow statement?

Assets	2001	2002
Cash	1000	200
Accounts receivable	1000	1800
Inventory	1000	1000
Net fixed assets	9000	8800
<b>Total assets</b>	<b>12000</b>	<b>11800</b>

Liabilities / Equity	2001	2002
Current liabilities	4000	4200
Accruals	0	100
Long-term debt	4000	3500
Common stock	4000	4000
Retained earnings	0	0
<b>Total</b>	<b>12000</b>	<b>11800</b>

Income statement	2001	2002
= Net income	0	0

Operating activities	2002
+ Net income	0
+ Depreciation	+ 200
+ Accruals	+ 100
- Increase C/A	- 800
+ Increase accounts p.	+ 200
<b>Cash flow</b>	<b>- 300</b>

Financing activities	2002
+ Increase notes payable	0
+ Increase long-term debt	- 500
+ Increase common stock	0
- Dividends	0
<b>Cash flow</b>	<b>- 500</b>

Investment activities	2002
+ Ending fixed assets	8800
- Beginning fixed assets	- 9000
+ Depreciation	+ 200
<b>Cash flow</b>	<b>0</b>

**total cash flow =**

$$- 300 + 0 - 500 = - 800 \checkmark$$

# 1. Introduction to Financial Accounting

## 1.5.1. Accounting Transaction (4)

### Example: Trading Company: Cheap Computers Start-up Inc.

Assume the following accounting transactions for one year:

■ Owners buy shares for	50.000 €
■ Company gets a credit from a bank (time to maturity 10 years)	30.000 €
■ Company pays wages over the year	20.000 €
■ Company pays for renting office space	12.000 €
■ Company buy furniture, equipment etc.	8.000 €
■ Company buys 200 computers (800 € per computer)	160.000 €
■ Company sells 180 computers (1.100 € per computer)	198.000 €
■ Company pays interest on liabilities (10% interest rate)	3.000 €
■ Suppliers grant credit	20.000 €
■ Company grants credit to customers	40.000 €
■ Company depreciates equipment	1.000 €
■ Tax rate is 30%	

# 1. Introduction to Financial Accounting

## 1.5.1. Accounting Transaction (5)

### Example: Trading Company: Cheap Computers Start-up Inc.

<b>Income statement</b>	<b>01</b>
Sales	+ 198.000
- Cost of goods sold	- 144.000
- Depreciation	- 1.000
- Wages	- 20.000
- Rent	- 12.000
= EBIT	+ 21.000
- Interest paid	- 3.000
= Taxable Earnings	+ 18.000
- Taxes	- 5.400
= Net income	+ 12.600

# 1. Introduction to Financial Accounting

## 1.5.1. Accounting Transaction (6)

### Example: Trading Company: Cheap Computers Start-up Inc.

<b>Balance Sheet 01</b>			
Cash	49.600	Accounts payable	20.000
Accounts receivable	40.000	Notes payable	0
Inventory	16.000	Long term debt	30.000
Net fixed assets	7.000	Common stock	50.000
		Retained Earnings	12.600
<b>Total assets</b>	<b>112.600</b>	<b>Total equity and liabilities</b>	<b>112.600</b>

# 1. Introduction to Financial Accounting

## 1.5.1. Accounting Transaction (7)

### Example: Trading Company: Cheap Computers Start-up Inc.

<b>Operating activities</b>	<b>01</b>
+ Net income	12.600
+ Depreciation	+ 1.000
- Increase C/A	- 56.000
+ Increase accounts payable	+ 20.000
Cash flow	- 22.400

<b>Investment activities</b>	<b>01</b>
+ Ending fixed assets	7.000
- Beginning fixed assets	- 0
+ Depreciation	+ 1.000
Cash flow	+ 8.000

<b>Financing activities</b>	<b>01</b>
+ Increase long-term debt	+ 30.000
+ Increase common stock	+ 50.000
Cash flow	+ 80.000

# 1. Introduction to Financial Accounting

## 1.5.2. Exercise

### Trading Company: Expensive Computers Start-up Inc.

Assume the following accounting transactions for one year:

■ Owners buy shares for	40.000 €
■ Company gets a credit from a bank (time to maturity 6 years)	60.000 €
■ Company pays wages during the year	30.000 €
■ Company pays for renting office space	12.000 €
■ Company buy furniture, equipment etc.	20.000 €
■ Company buys 1.000 computers (800 € per computer)	800.000 €
■ Company sells 400 computers (1.500 € per computer)	600.000 €
■ Company pays interest on liabilities (10% interest rate)	6.000 €
■ Suppliers grant credit	80.000 €
■ Company grants credit to customers	120.000 €
■ Company depreciates equipment	2.000 €
■ Company sets up accruals for pensions	10.000 €
■ Tax rate is 30%	
■ Company pays dividends	40.000 €

# 1. Introduction to Financial Accounting

## 1.5.2. Exercise (2)

### Trading Company: Expensive Computers Start-up Inc.

<b>Income statement</b>	<b>01</b>
Sales - Cost of goods sold - Depreciation - Wages - Rent - Accruals for pensions = EBIT -Interest paid = Taxable Earnings - Taxes	
= Net income - Dividends = Retained Earnings	

# 1. Introduction to Financial Accounting

## 1.5.2. Exercise (3)

### Trading Company: Expensive Computers Start-up Inc.

Balance Sheet 01			
Cash		Accounts payable	
Accounts receivable		Notes payable	
Inventory		Long term debt	
Net fixed assets		Accruals for pensions	
		Common stock	
		Retained Earnings	
Total assets		Total equity and liabilities	

# 1. Introduction to Financial Accounting

## 1.5.2. Exercise (4)

### Trading Company: Expensive Computers Start-up Inc.

<b>Operating activities</b>	<b>01</b>
+ Net income	
+ Accruals	
+ Depreciation	
- Increase C/A	
+ Increase accounts payable	
Cash flow	

<b>Investment activities</b>	<b>01</b>
+ Ending fixed assets	
- Beginning fixed assets	
+ Depreciation	
Cash flow	

<b>Financing activities</b>	<b>01</b>
+ Increase LTD, Notes payable	
+ Increase common stock	
- Dividends paid	
Cash flow	

$$\text{Total Cash Flow} = - 354.000 - 20.000 + 374.000 = 0$$

# 1. Introduction to Financial Accounting

## 1.6. Inventory

---

### Definition:

Goods owned by a business and held either for

- Use in the manufacture of products
- Products awaiting sale

Inventories are classified as

1. Merchandise inventory: goods purchased for resale
2. Manufacturing inventory
  - Raw materials: goods obtained for direct use in the manufacture
  - Work in progress: goods requiring further processing
  - Finished goods: manufactured items held for sale
  - Manufacturing supplies, e.g. cleaning materials
3. Miscellaneous inventory, e.g. office supplies

# 1. Introduction to Financial Accounting

## 1.6.1. Basic Concepts

---

- Inventories are an important asset to most businesses.
- Inventories represent typically the largest current asset of manufacturing and retail companies

### To consider:

- Adequate inventory levels are important to companies in assuring production schedules and meeting customer requirements
- Holding inventories at the same time is costly  
→ **just-in-time production**

# 1. Introduction to Financial Accounting

## 1.6.1. Basic Concepts (2)

---

### **Components of inventory cost**

Inventory cost is measured by the total cash equivalent outlay made to acquire the goods and prepare them for sale:

- Purchase cost
- Incidental costs incurred until goods are ready for use or sale

### **Not allocated but reported as separate expenses:**

- Insurance costs on goods in transit
- Sales taxes paid
- Material-handling expenses

### **Not allocated but reported as period expenses:**

- General and administrative expenses
- Selling and distribution costs

# 1. Introduction to Financial Accounting

## 1.6.2. Inventory Costing Methods

---

### General problem

- The unit cost of inventory often changes
- How can an accountant assign a cost to each item sold?

The four costing methods e.g. GAAP allows are:

1. Specific unit cost
2. Weighted-average cost
3. First-in, first-out (FIFO) cost
4. Last-in, first-out (LIFO) cost

# 1. Introduction to Financial Accounting

## 1.6.2. Inventory Costing Methods (2)

---

### Specific Unit Cost

Inventory cost method based on the specific cost of particular units of inventory.

Also called: *specific identification method*

#### Example:

A car dealer has two cars to sell; a model A that cost 10.000 € and a model B that cost 20.000 €.

Suppose the dealer sells model B for 22.000 €,

→ so the cost of goods sold is 20.000 € and

→ the remaining inventory, therefore, is 10.000 €.

# 1. Introduction to Financial Accounting

## 1.6.2. Inventory Costing Methods (3)

### Weighted-Average Cost

Inventory cost method based on the weighted-average cost of inventory during the period.

To determine the weighted-average cost one divides the cost of goods available for sale (beginning inventory plus purchases) by the number of units available.

Also called: *average-cost method*

#### Example:

Suppose:	Beginning inventory (30 units @ 10 € per unit)	300 €
	Purchase 1 (20 units @ 20 € per unit)	400 €
	Purchase 2 (10 units @ 30 € per unit)	300 €

→ Cost of goods available for sale: 1.000 €; Number of units available: 60

→ Average cost per unit: 16.67 €

# 1. Introduction to Financial Accounting

## 1.6.2. Inventory Costing Methods (4)

### First-In, First-Out (FIFO) Cost

Inventory costing method by which the first costs into inventory are the first costs out to cost of goods sold. Ending inventory is based on the costs of the most recent purchases.

#### Example:

Suppose:	Beginning inventory (30 units @ 10 € per unit)	300 €
	Purchase 1 (20 units @ 20 € per unit)	400 €
	Purchase 2 (10 units @ 30 € per unit)	300 €
	Ending inventory (20 units)	
→ Ending inventory:	500 € (10 @ 30 € + 10 @ 20 €)	
→ Cost of goods sold :	500 € (30 @ 10 € + 10 @ 20 €)	

# 1. Introduction to Financial Accounting

## 1.6.2. Inventory Costing Methods (5)

---

### Last-In, First-Out (LIFO) Cost

Inventory costing method by which the last costs into inventory are the first costs out to cost of goods sold. This method leaves the oldest costs in ending inventory.

#### Example:

Suppose:	Beginning inventory (30 units @ 10 € per unit)	300 €
	Purchase 1 (20 units @ 20 € per unit)	400 €
	Purchase 2 (10 units @ 30 € per unit)	300 €
	Ending inventory (20 units)	
→ Ending inventory:	200 € (20 @ 10 €)	
→ Cost of goods sold :	800 € (10 @ 10 € + 20 @ 20 € + 10 @ 30 €)	

# 1. Introduction to Financial Accounting

## 1.7. Fixed Assets

---

### Definition:

**Plant assets** are long-lived tangible assets used to operate a business. Plant assets are not held for sale.

**Intangible assets** are assets with no physical form. They are useful because of the special rights they carry.

### Types of fixed assets are

- Plant assets:
    - Land
    - Buildings
    - Machinery and Equipment
  - Intangible assets:
    - Patents, Copyrights, Trademarks
    - Goodwill
-

# 1. Introduction to Financial Accounting

## 1.7.1. Basic Concepts

The cost principle directs a business to carry an asset on the balance sheet at its cost → Cost of a plant asset = purchase price plus taxes, commission, ecc.

Terminology used in accounting for plant assets and intangibles:

<b>Asset account on the Balance Sheet</b>	<b>Related Expense Account on the Income Statement</b>
<b>Plant Assets</b> <ul style="list-style-type: none"> <li>■ Land</li> <li>■ Buildings, Equipment</li> <li>■ Natural Resources</li> </ul>	None Depreciation Depletion
<b>Intangibles</b>	Amortization

# 1. Introduction to Financial Accounting

## 1.7.2. Depreciation

---

### Definition

The allocation of a plant asset's cost to expense over the asset's useful life is called **depreciation**.

### Concept explanation:

- Depreciation is not a process of valuation. Businesses do not record depreciation based on market (sales) value of their plant assets at the end of each year. Instead, businesses allocate an asset's cost to expense during the period of its use.
- Depreciation does not mean that the business sets aside cash to replace an assets when it is used up. Establishing a cash fund is entirely separate from depreciation, and depreciation does not represent cash

### Causes of depreciation:

- Physical wear and tear
- Obsolescence

# 1. Introduction to Financial Accounting

## 1.7.2. Depreciation (2)

---

### Measuring Depreciation

- Cost: a known amount
- Estimated useful life
  - Length of the service period expected from an asset. May be expressed in years, units of output, miles, or another measure
- Estimated residual value (scrap value or salvage value)
  - Expected cash value of an asset at the end of its useful life.
- Depreciable cost
  - The cost of a plant asset minus its estimated residual value.

### Depreciation methods:

- Different methods allocate different amounts of depreciation to each period.
- However, they all result in the same total amount of depreciation over the life of the asset.

# 1. Introduction to Financial Accounting

## 1.7.2. Depreciation (3)

### Depreciation Methods:

#### Straight line (SL)

An equal amount of depreciation is assigned to each year of asset use.

$$\text{SL depr. per year} = \frac{\text{Cost} - \text{Residual value}}{\text{Useful life, in years}}$$

#### Example

A truck is expected to be driven during its useful life of 4 years.

Therefore, the depreciation rate per year is  $\frac{1}{4}$  or 0.25 per year.

The asset cost is 110.000 €, residual value is expected to be 10.000 €.

Year	Depreciation Rate	Depreciable Cost	Depreciation Expense	Accumulated Depreciation	Asset Book Value
1	0.25	100.000 €	25.000 €	25.000 €	85.000 €
2	0.25	100.000 €	25.000 €	50.000 €	60.000 €
3	0.25	100.000 €	25.000 €	75.000 €	35.000 €
4	0.25	100.000 €	25.000 €	100.000 €	10.000 €

# 1. Introduction to Financial Accounting

## 1.7.2. Depreciation (4)

### Depreciation Methods:

#### Double-declining balance (DDB)

An accelerated depreciation method that multiplies the asset's decreasing book value by a constant percentage that is 2 times the SL depreciation rate.

DDB depr. for the first year = Asset book value at the beginning of the year · DDB rate

#### Example

A truck is expected to be driven during its useful life of 4 years.

SL depreciation rate per year is  $\frac{1}{4}$  or 0.25 per year → DDB rate = 0.5

The asset cost is 110.000 €, residual value is expected to be 10.000 €.

Year	DDB Rate	Asset Book Value	Depreciation Expense	Accumulated Depreciation	Asset Book Value
1	0.5	110.000 €	55.000 €	55.000 €	55.000 €
2	0.5	55.000 €	27.500 €	82.500 €	27.500 €
3	0.5	27.500 €	13.750 €	96.250 €	13.750 €
4		13.750 €	3.750 €	100.000 €	10.000 €

# 1. Introduction to Financial Accounting

## 1.8. Financial Analysis

---

### Questions and Objectives:

- Is a company able to achieve its business objectives?
  - Create value for its shareholders / owners
  - Employee satisfaction, social responsibility etc.
- Information to assess a company's financial strength
- Information to assess a company's liquidity status
- Information to assess a company's profitability
- Information to assess a company's overall development
- Information to make comparison possible (often industry-specific)
- Etc.

# 1. Introduction to Financial Accounting

## 1.8. Financial Analysis (2)

---

### **Bases for Comparison:**

#### **Experience**

- Subjective standards

#### **Budgets**

- Compare performance with prepared budgets
- BUT: budgeted amounts might not have been developed carefully
- BUT: budgets are based on assumptions that turned out to be incorrect

#### **Historical Standards**

- Continuous improvement hypothesis
- BUT: It only shows that a company did better or worse

#### **External Benchmarks**

- Compare company with others
- BUT: environmental and accounting differences
- BUT: different tax treatment

# 1. Introduction to Financial Accounting

## 1.8.1. Introduction and Preparation

---

### **Balance Sheet Preparation:**

#### Objective:

Aggregation of specific items of a balance sheet

Determination of percentage measures of total assets

Consideration of figures of the preceding year and annual absolute changes

#### Problems:

Maturity of liabilities → explanatory notes

Maturity of accruals → esp. for pensions generally not assessable

Use of net income

Differences in definition of items

# 1. Introduction to Financial Accounting

## 1.8.1. Introduction and Preparation (2)

	<b>Item of Balance Sheet</b>	<b>Summarize to:</b>
Fixed Assets	Intangible Assets Long-term tangible Assets Long-term Investments and Participations	Fixed Assets Fixed Assets Investments
Current Assets	Inventory Accounts receivable Prepaid expenses Securities and Cash	Inventory Accounts receivable Accounts receivable Cash
Equity	Equity (all forms) Net income (depending on use)	Equity Equity (retained earnings) or Current liabilities (dividend payment)
Long-term debt	Accruals for pensions Bonds, Debt with time to maturity > 5 years	Long-term debt Long-term debt
Current Liabilities	Accruals (all except pensions) Debt (notes payable) with time to maturity ≤ 5 years Current maturities of long-term debt Accounts payable	Current Liabilities Current Liabilities Current Liabilities Current Liabilities

# 1. Introduction to Financial Accounting

## 1.8.1. Introduction and Preparation (3)

---

Item	Year 01	Percentage	Year 02	Percentage	Absolute change
Fixed assets					
Investments					
Inventory					
Accounts receivable					
Cash					
Total assets		100%		100%	
Equity					
Long-term debt					
Current liabilities					
Total Liabilities and Equity		100%		100%	

# 1. Introduction to Financial Accounting

## 1.8.2. Balance Sheet Analysis

---

### General Information from a Balance Sheet:

- Assets: How did the company invest its capital?
- Liabilities and Equity: Where did the capital come from?

### Forms of Balance Sheet Analysis:

- Capitalization Structure
- Asset Structure
- Fixed Asset Coverage
- Liquidity Analysis

# 1. Introduction to Financial Accounting

## 1.8.2.1. Capitalization Structure

### Composition of Capital

- Shareholders bear company's financial risk
- Creditors expect interest payments and reimbursement

### Objective:

- Solidity of Financing
- Creditworthiness

Assets	Liabilities
Current Assets	Current Liabilities
Fixed Assets	Long-term Debt
	Equity
Total Assets	Total Liabilities and Equity

# 1. Introduction to Financial Accounting

## 1.8.2.1. Capitalization Structure (2)

### Total equity ratio =

- Financial independence
- Bosch Group World 1998: 33%

$$\frac{\text{Equity}}{\text{Total liabilities and equity}} \cdot 100\%$$

### Total debt ratio (Leverage) =

- Dependence on creditors and leverage
- Bosch Group World 1998: 67%

$$\frac{\text{Total liabilities}}{\text{Total liabilities and equity}} \cdot 100\%$$

### Long-term debt ratio =

- Bosch Group World 1998: 2%

$$\frac{\text{Long - term debt}}{\text{Total liabilities and equity}} \cdot 100\%$$

### Current liabilities ratio =

- Bosch Group World 1998: 45%

$$\frac{\text{Current liabilities}}{\text{Total liabilities and equity}} \cdot 100\%$$

# 1. Introduction to Financial Accounting

## 1.8.2.2. Asset Structure

### Composition of Assets

- Companies / Industries with high fixed asset ratio  
→ fixed costs (heavy industry, chemical industry, engine building industry)
- Companies / Industries with high current asset ratio  
→ variable costs (electrical industry, financial service provider)

### Objective:

- Use of capital
- Flexibility of investments

Assets	Liabilities
Current Assets	Current Liabilities
Fixed Assets	Long-term Debt
	Equity
Total Assets	Total Liabilities and Equity

# 1. Introduction to Financial Accounting

## 1.8.2.2. Asset Structure (2)

### (Fixed) asset intensity =

- Indicator for fixed costs
- Bosch Group World 1998: 35%

$$\frac{\text{Fixed Assets}}{\text{Total Assets}} \cdot 100\%$$

### Current assets to total assets =

- Indicator for variable costs
- Bosch Group World 1998: 65%

$$\frac{\text{Current Assets}}{\text{Total Assets}} \cdot 100\%$$

### Inventory intensity =

$$\frac{\text{Inventory}}{\text{Total Assets}} \cdot 100\%$$

### Accounts receivable intensity =

$$\frac{\text{Accounts Receivable}}{\text{Total Assets}} \cdot 100\%$$

### Cash intensity =

$$\frac{\text{Cash}}{\text{Total Assets}} \cdot 100\%$$

# 1. Introduction to Financial Accounting

## 1.8.2.3. Fixed Asset Coverage

### Coverage of fixed assets

- Coverage of fixed assets by equity  
→ Fixed assets can't be claimed from creditors
- Solidity of liquidity

# 1. Introduction to Financial Accounting

## 1.8.2.3. Fixed Asset Coverage (2)

---

### Equity to assets ratio I =

- Coverage with equity
- Bosch Group World 1998: 33%

$$\frac{\text{Equity}}{\text{Fixed Assets}} \cdot 100\%$$

### Equity to assets ratio II =

- Coverage with long-term financing
- Bosch Group World 1998: 156%

$$\frac{\text{Equity} + \text{Long - term Debt}}{\text{Fixed Assets}} \cdot 100\%$$

# 1. Introduction to Financial Accounting

## 1.8.2.4. Liquidity Analysis

### Working Capital Management

- Short-term solvency
- Optimal allocation of short-term liabilities

### Objective:

- Avoiding financial illiquidity
- Avoiding unnecessary long-term financing

Assets	Liabilities
	Current Liabilities
Current Assets	Long-term Debt
Fixed Assets	Equity
Total Assets	Total Liabilities and Equity

# 1. Introduction to Financial Accounting

## 1.8.2.4. Liquidity Analysis (2)

### Cash ratio =

- Cash liquidity
- Bosch Group World 1998: 43%

$$\frac{\text{Cash}}{\text{Current Li abilities}} \cdot 100\%$$

### Quick ratio (Acid test ratio) =

- Bosch Group World 1998: 104%

$$\frac{\text{Current Assets} - \text{Inventory}}{\text{Current Li abilities}} \cdot 100\%$$

### Current ratio =

- Sales Liquidity
- Bosch Group World 1998: 143%

$$\frac{\text{Current Assets}}{\text{Current Li abilities}} \cdot 100\%$$

# 1. Introduction to Financial Accounting

## 1.8.3. Income Statement Analysis

---

### General Information from an Income Statement:

- How did the company use its assets?
- How profitable did the capital work?

### Forms of Income Statement Analysis:

- Asset Utilization or Turnover Ratios
- Profitability Ratios

# 1. Introduction to Financial Accounting

## 1.8.3.1. Asset Utilization

---

### Working Capital Management (Assets)

- capital turnover → capital lockup  
which capital investment is necessary to realize sales?

- Reduction of capital lockup
- Reduction of time for payment
- Reduction of time of storage  
→ Increase flexibility of the company

# 1. Introduction to Financial Accounting

## 1.8.3.1. Asset Utilization (2)

### Capital (Equity) turnover =

- Capital lockup =  $360/\text{capital turnover}$
- Bosch Group World 1998: 86 days

$$\frac{\text{Sales}}{\text{Equity}}$$

### Receivables turnover =

- Days sales outstanding =  $360/\text{receivables turnover}$
- Bosch Group World 1998: 57 days

$$\frac{\text{Sales}}{\text{Accounts Receivables}}$$

### Inventory turnover =

- Time of storage =  $360/\text{inventory turnover}$
- Bosch Group World 1998: 90 days

$$\frac{\text{Cost of goods sold}}{\text{Inventory}}$$

# 1. Introduction to Financial Accounting

## 1.8.3.2. Profitability Analysis

---

### Net Income corrected

- Eliminate extraordinary Income
- Capital Ratios
- Sales Ratios

### Objective:

- Maximize return on equity
- Causes of profitability

# 1. Introduction to Financial Accounting

## 1.8.3.2. Profitability Analysis (2)

**Return on equity (ROE) =**

- The higher, the better
- Bosch Group World 1998: 7.2%

$$\frac{\text{Net Income}}{\text{Total Equity}} \cdot 100\%$$

**Risk premium = Return on equity – market interest rate**

**Return on assets (ROA) =**

- Bosch Group World 1998: 3.1%

$$\frac{\text{Net Income} + \text{Interest paid}}{\text{Total Assets}} \cdot 100\%$$

**Profit margin (Return on sales) =**

- The higher, the better
- Bosch Group World 1998: 1.7%
- Average of German industrial companies: 2% (after tax)

$$\frac{\text{Net Income}}{\text{Sales}} \cdot 100\%$$

# 1. Introduction to Financial Accounting

## 1.8.4. Cash Flow Statement Analysis

---

### General Information from an Cash Flow Statement:

- What are the financial means of a company to self-finance it?
- What is financial potential of the company for investments, debt redemption and paying dividends?

### Forms of Cash Flow Statement Analysis:

- Cash flow
- Cash flow margin
- Dynamic gearing

# 1. Introduction to Financial Accounting

## 1.8.4. Cash Flow Statement Analysis (2)

### Cash flow

- The higher, the better
- Bosch Group World 1998: 4,904 million DM

### Cash flow margin =

$$\frac{\text{Cash Flow from operating activities}}{\text{Sales}} \cdot 100\%$$

- Percentage of Sales available for self-financing
- Bosch Group World 1998: 9,7%

### Dynamic gearing =

$$\frac{\text{Total Debt}}{\text{Cash Flow}}$$

- How long would it take to pay back debt?
- Suggested value: 3 - 3,5
